**MINTON and CO.'S ENCAUSTIC and** other PATENT TILES for Churches, Entrance Halls, Conservatories, Dairies, &c.; Antique, Geometrical, and Alhambra Mosaics, manufacturers of a highly decorative character and supreme durability. Slabs and Tiles for Fireplaces and Hearths. Chimney Tops for Grates. Door Furniture. White Glazed and Ornamental Tiles for Baths, Dairies, and Kitchen Ranges, may be had in great variety at their Warehouse, 9, Albion-place, Great Prince's-street, London, and at their Manufactory, Stoke-upon-Trent, Staffordshire.

**MAW'S ENCAUSTIC TILES.** — Prices and Samples (Plain or Glazed) of this beautiful and durable production of mediæval art, and Patterns appropriate for the floors or walls of public and private edifices, in every style of design forwarded on application to MAW and CO. at their Works, Worcester. N.B. — Plans of spaces to be paved covered with arrangements of Tile Patterns, without charge.

**PERMANENT STUCCO WASH,** WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

As used at St. George's Hospital, Hyde Park Corner.

JOHNS and CO. having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing every advantage over the common Lime Wash or Water Colour for STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other.—DOES NOT WASH OFF—is perfectly dry in twenty-four hours, and being a non-conductor, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One coat will cover 100 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external surfaces, is found to be the cheapest of its kind: it has no caustic qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prices, patterns, and every information may be obtained, on application to the Sole Agents, PHILIP HARE and Co. at the Warehouses, 28, Steel-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

**PARIAN CEMENT** for internal use, to be PAINTED IN A FEW HOURS, AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SONS, Patentees, Nine Elms, London.

**GEORGE and THOMAS EARLE,** CEMENT MANUFACTURERS, HULL.

Light and Dark equal to any made.

Also, Manufacturers of PLASTER, MASTIC, &c.

Importers of MARBLE and PUZZOLANA.

Dealers in Stone, Slate, Hair, Whiting, &c.

**ATKINSON'S CEMENT,** so long known and esteemed in London for plastering purposes, is a quick-setting cement that requires no colouring.—Sold exclusively by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster, and Steel street, Liverpool.

**KEENE'S and PARIAN CEMENTS** and FRENCH PLASTER for internal use.—These well known hard cements dry quickly, and can be painted upon within a few days. Made and sold by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster.

**PORTLAND CEMENT** is the cheapest, because the best Cement for external use. As a stucco, it requires no colouring, does not vegetate, and is not affected by frost. As a mortar for brick-work, it may be mixed with three to four parts of sand; and, for concrete, it will carry ten to twelve times its volume of sand and gravel.—Manufactured by JOHN BAZLEY WHITE and SONS, 17, Millbank-street, Westminster, and Steel-street, Liverpool.

**PORTLAND CEMENT,** in Casks of Four Imperial Bushels QUANTITY, NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

6, South Wharf, Paddington.

**PORTLAND CEMENT.—CHARLES** RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality as Sunderstrum never before attained in Portland Cements. It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement: does not vegetate, turn green, or crack, combined with which its eminent hydraulic properties cause it at once as the first cement of the day for work where all those adhesive qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by R. GREAVES, Esq. at his Works near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

**PORTLAND CEMENT.—JAMES WESTON,** having commenced manufacturing the above Cement, beg to inform the trade in general that he can supply them with any quantity they may require, either at his Works, Mill-wall, Poplar; St. Andrew's Wharf, Earl-street, Blackfriars; or Middle Scotland-yard, Wandsworth, Manufacturer of Roman, Lias, and Mastic Cements, French and English Plaster, &c.

**PORTLAND CEMENT WORKS, NORTHFLEET, KENT.**—Messrs. ROBINS and CO. solicit the attention of their friends and the public to their superior Cement, confident that the great improvement in the manufacture thereof during the present year will insure to them a continuance of that patronage with which they have so long been favoured.—Orders received at the Works, and at Great Scotland-yard, Whitehall.

March, 1852.

**PORTLAND CEMENT.**—The difficulty of procuring this valuable Cement of uniform colour and strength has hitherto prevented its more general use. Contractors and Builders will find that these two important qualities may be depended on with the greatest certainty in that manufactured by CHARLES J. HILTON, at his Messrs and Portland Cement and Plaster of Paris Works, Faversham, Kent, at which place, as also at his Wharf in Lambeth, 4, Upper Thames-street, City, and Great Scotland-yard, Westminster, orders can now be received to any extent.

**PATENT PORTLAND and ROMAN** CEMENTS.—WINKFIELD, BELL, and CO. of East Greenwich, Kent, having now completed some heavy contracts, are prepared to execute orders to any extent for either of the above Cements, which they can supply at the lowest current rate, and in their cementitious qualities at present manufacturing. Many highly respectable references can be given where their Cements have been successfully used. Orders addressed to their Works will be punctually attended to, and terms cash. Where quantities are used a corresponding price will be made.—Agent at Southampton, Mr. GEORGE SHARPE, Union Wharf.

**MEDINA (ROMAN) CEMENT.**—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the Sheppy Stone, but is much harder adapted to carving or other works, from the rapidity with which it sets and hardens under water. It has been largely used at the great Breakwater at Cherbourg; in a similar work at Alderney; and at Dover new pier, to unite the masonry. The foundation of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new groyne at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and sea shingle. The work extends 200 feet into the sea, and is exposed to the most violent gales of the Channel, in a position where every former constructions had been repeatedly washed away. The incorruptible of the united qualities of Roman Cement are superseded by the use of this improved manufacture.

CHAS. FRANCIS and SONS, Nine Elms, London; or West Medina Mill, Newport, Isle of Wight.

Agent for Southampton, R. L. TLUDER, American Wharf.

**ROMAN and OTHER CEMENTS,** Manufactured by J. M. BLASHFIELD, successor to the Patentees, PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT; also Terras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Tripods, &c.

Manufactory, Mill Wall, Poplar; Depôts, Commercial-road, Lambeth, and Paddington-basin.

**BARROW LIME.**—This celebrated hydraulic Lime, from the Blue Lias Stone, can now be forwarded by railway fresh from the kilns to any part of the kingdom. It is becoming much more generally used for Concrete, and can be supplied ready ground for that purpose. Price, &c. may be obtained on application to JOHN ELLIS and SONS, Leicester.

**THOMAS FREEN and CO. LIME BURNERS,** Woodham-on-the-Medway. Grey and Chalk Lime supplied by the freight direct from the Kilns, or fresh from their wharfs, viz. Canal-road, Kingsland road; Queen's Wharf, Great Cambridge-street, Hoppertown; or King's Wharf, New Wharf-road, Battle-bridge. N.B. Laths, Tiles, Chimney-pots, Plaster, Hair, Welsh Grotto, &c. &c. &c.

**GREAVES'S BLUE LIAS LIME.**—The superior manner in which the above is ground renders it cheaper for concrete or stucco than any other lime or cement. The shell lime for mortar is burnt on an improved principle, leaving scarcely any core. The satisfaction constantly expressed by Engineers, Architects, and Contractors of the above, is its best recommendation.
